

Help for declawed cats!

These vets have generously offered to provide consultations to other vets regarding how to recognize problems related to phalangectomy procedures (onychectomy/declawing) and how to provide palliative and reparative care (e.g., physical therapy, salvage surgery, medications, laser therapy, etc.) to cats in need. They are NOT able to help clients directly unless the client makes a physical appointment at their facility. They will only work with you through your vet.

Marcy Hammerle, DVM, Diplomate ABVP (canine and feline)
Missouri Paw Project director
The Pet Doctor
3046 Winghaven Blvd, OFallon MO. 63368
Easiest contact is clinic email: Thepetdoctorinc@gmail.com
